

JOB DESCRIPTION

VACANCY NUMBER **6376N**

ORGANISATION: **BROWN CONSULTING**

JOB TITLE **Bridge Engineer and Bridge Draftsperson - Melbourne, Australia**

POSITION SUMMARY

This design engineering consultancy is seeking design engineers and draftspersons experienced in the design and documentation of Bridges. Ideally you will have a Civil or Structural Engineering tertiary qualification, with five plus years working in a similar environment, design consultancy.

Bridge Engineer and Bridge Draftsperson

- Melbourne CBD location
- Great remuneration
- Continuous learning and development opportunities

Have you been contemplating a move to one of the world's most liveable cities? Do you have expertise in the design of Bridges or perhaps experience in drafting documentation of Bridges?

If the answer is yes read on.....

Recently joining a significant national mining organisation, this design engineering consultancy is the specialist infrastructure design arm for the group. They provide this service from their Melbourne CBD office.

They are seeking design engineers and draftspersons experienced in the design and documentation of Bridges. Ideally you will have a Civil or Structural Engineering tertiary qualification, with five plus years working in a similar environment, design consultancy.

The senior managers in this organisation are hands on practitioners and take a direct interest in every project. You will have the opportunity to be mentored by experienced practitioners, take part in the organisations professional development program and will get to work on a diverse range of projects.

Rather than being a 'number' in large firm, employees in this organisation are recognised for their contribution.

With an abundance of work generated across the thriving mining industry, you have the reassurance of long term ongoing work. This is also an opportunity to work on some exciting major national and international projects, namely rail and road infrastructure for associated mining projects.

Positions available:

- Bridge Design Engineer x2
- Bridge Draftsperson x2 (Autocad or Microstation)

An attractive remuneration will be negotiated based on your experience.
